

**POWER SUPPLY****KC Series** (650W, 750W, 850W)

KC Series power supply combines true power with performance. KC series is an ideal solution for Gamers, Modders, Server and Power users who demand the very best from their system.

- High Efficiency max 87%
- Flat Cables: cable management is easier than ever
- Double-Bearing Fan: quiet and thermally controlled 120mm cooling fan
- Powerful Single +12V Rail: enhanced 12V rail for industry latest components
- High-Safety Standards: meets medical equipment safety standard

**POWER SUPPLY****M18 Series** (470W, 530W)

- High efficiency 80PLUS certified
- Quiet and Long-Lasting 120mm NanoTek bearing with 3x lifetime than traditional bearings
- Powerful and Reliable – enhanced 12V power with dual rail design
- Industrial Grade Components – selection of high quality components

**POWER SUPPLY****PowerBird Series** (900W, 1100W)

PowerBird provides greatest freedom of cable routing and customization with fully modularized cables, and maximum 87% efficiency. PowerBird is truly a build of craftsmanship that is designed to meet today's most demanding gaming machine and expectations of system builders

- Fully modularized cable management to eliminate clutter and improve airflow inside the case
- Guaranteed to deliver rated specifications at 40 Degree C
- Thermally controlled 120MM double ball-bearing fan from Sanyo Denki
- High efficiency max 87%
- Industrial grade Japanese primary capacitors
- Full range input 115~240Vac with active power factor correction (PF>0.99)
- Six 12V rails to provide superior safety and stable current

**POWER SUPPLY****ZUMAX Series** (400W ~ 1050W)

- Stable and reliable to meet your everyday computing needs
- Quiet operation with enhanced cooling solutions
- Active PFC with auto full range AC input (750W and above)
- Support Nvidia SLI and AMD Eyefinity VGA card (550W and above)

**POWER SUPPLY****Tiger Series** (1000W, 1200W, 2000W)

Featuring the latest switching power technologies with highly-efficient power converting, Think outside of the box, Topower presents the king of power supply, the Tiger 2000W power supply.

- Designed to meet your extreme computing tasks
- Patented XLR type modular cable connectors
- Guaranteed to deliver rated specifications at 40 Degree C
- High efficiency max 87%
- Industrial grade Japanese primary capacitors
- Full range input 115~240Vac with active power factor correction (PF>0.99)
- Six 12V rails to provide superior safety and stable current

**Personal Computer****TOP PC** (Case and Power Supply)

- Mini ITX form factor
- 100% aluminum case compatible with Intel motherboard D945GCLF · D945GCLF2 (Intel ATOM single / dual core-desktop)
- Low power consumption, noiseless, low heat
- Power Supply: 135W
- Slot in DVD/CDROM, E-SATA Connector, USB Charger, SD/Micro SD Card Reader
